

Course name: Data Science Fundamentals for the Social Sciences
Day of class: Monday

Week 1

Date: 23/02

Topic: Applying Data Science to Social Issues (Slides 1)

Week 2

Date: 02/03

Topic: Data types, control structures

Week 3

Date: 09/03

Topic: Functions, classes

Week 4

Date: 16/03

Topic: OS, dir, paths, file types: txt, xlsx, csv, json, xml

Week 5

Date: 23/03

Topic: Create DataFrame, select queries, sort, edit values

Week 6

Date: 30/03

Topic: Intro statistics lecture (Slides 2), Univariate

Week 7

Date: 06/04

Topic: Dashboards, Posters, Final Project Instructions

Week 8

Date: 13/04

Topic: Group, agg fxns, group.agg, create

Assignments: Milestone 1 Due

Week 9

Date: 20/04

Topic: Bivariate graphs, z-test, logistic regression

Week 10

Date: 27/04

Topic: Merge, melt & pivot, index, look-up

Assignments: Milestone 2 Due

Week 11

Date: 04/05

Topic: Simple profiles, profile series & multivariate graphs, regression table, summarize analysis

Week 12

Date: 11/05

Topic: Re-coding, missing values, disambiguation

Assignments: Milestone 3 Due

Week 13

Date: 18/05

Topic: Predicted probabilities, profile plots

Week 14

Date: 25/05

Topic: Online APIs, web-scraping, multiple

Assignments: Milestone 4 Due

Week 15

Date: 01/06

Topic: Clustering

Week 16

Date: 08/06

Exams: Final Presentations
